Intake questionnaire

Before I write you a single calorie number, I need a map of your life. This questionnaire draws it: goals, history, health, your environment and your preferences. Fill it in and send it in writing on WhatsApp before we start. No call. The more specific you are, the better the plan fits.

1) The basics

Name:

Age:

Height / weight:

Job (desk / active, shifts?):

Family / who cooks at home:

2) The goal

What do you want to achieve? (as specific as you can)

Why now? What happens if nothing changes?

How important is this to you? (1 = not very, 5 = it matters a lot)

1 2 3 4 5

3) History

What diets / approaches have you already tried? What worked, and what didn't?

Lowest / highest adult weight, and when:

Has the weight come back after a diet (yo-yo)? What led up to it?

4) Health

> **For you, and for me:** I am not a doctor and I don't diagnose. If you take medication, you have a condition (diabetes, thyroid, heart, or anything similar), you are pregnant or breastfeeding, or anything here points to an eating disorder, **talk to your doctor before we set a deficit**, and we work alongside them. Clinical situations belong with a professional. Do not put doses of medication on this sheet for me to adjust. I will not advise on them.

Medication you take regularly (names are enough, not doses for me to change):

Diagnoses / health limits (including movement: back, knees...):

Allergies and intolerances:

5) Real life (this is where it is won)

How many hours do you sleep?

Stress in a normal week (1-5):

1 2 3 4 5

How many times a week do you eat out?

Food budget: is it a constraint?

When and where do you overeat most often? What leads up to it? (evening on the sofa, after work, the weekend...)

Alcohol, how much and how often:

6) Movement

What movement do you do now (and what do you at least somewhat enjoy)?

How much time do you really have (days × minutes):

Equipment (gym / home / outdoors):

7) Food: preferences

What has to stay in the diet (or you will quit):

What you don't eat / can't stand:

How much time do you want to spend cooking?

Agreement on the approach: I understand the plan will be built on a sustainable calorie deficit / routine with no banned foods, that results come in weeks (not days), and that I will fill in a weekly check-in in writing on WhatsApp. No calls.

Why this exists: without a map of your week, any plan is a guess. Send the filled sheet in writing on WhatsApp before we set calories.
